Social Monitoring Report

PUBLIC

Semestral Report: Jan-June 2026
Project Number: 50347-002 и 50347-004
July 2026

Republic of Tajikistan:

G 0612 – TAJ: Dushanbe Urban Water Supply and Sanitation Project and G 0841 – TAJ: Dushanbe Water Supply and Sanitation Project - Additional Financing

Prepared by State Unitary Enterprise Dushanbe Vodokanal (DVK) for the Government of the Republic of Tajikistan and the Asian Development Bank.

This semi-annual social monitoring report is a document of the borrower. The views expressed herein do not necessarily represent those of ADB's Board of Directors, Management, or staff, and may be preliminary in nature. Your attention is directed to the "terms of use" section of ADB's website.

In preparing any country program or strategy, financing any project, or by making any designation of or reference to a particular territory or geographic area in this document, the Asian Development Bank does not intend to make any judgments as to the legal or other status of any territory or area.

ABBREVIATIONS AND ACRONYMS

ADB	Asian Development Bank
DMS	Detailed measurement survey
DP	Displaced person
AH	Affected household
SUE DVK	State Unitary Enterprise Dushanbevodokanal
EA	Executing agency
FP	Focal person
GRC	Grievance redress committee
GRM	Grievance redress mechanism
HH	Household
IR	Involuntary resettlement
PIG	Project Implementation Group
LAR	Land acquisition and resettlement
SSDDR	Social Safeguard Due Diligence Report
TRTA	Transaction Technical Assistance
RT	Republic of Tajikistan
SPS	Safeguard Policy Statement
TJS	Tajikistani Somoni (currency)

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

GLOSSARY

Displaced Persons (DP)	'In the context of involuntary resettlement, displaced persons are those who are physically displaced (relocation, loss of residential land, or loss of shelter) and/or economically displaced (loss of land, assets, access to assets, income sources, or means of livelihoods) as a result of (i) involuntary acquisition of land, or (ii) involuntary restrictions on land use or on access to legally designated parks and protected areas.' (ADB SPS 2009)
Detailed Measurement Survey (DMS)	With the aid of the approved detailed engineering design, this activity involves the finalization and/or validation of the results of the inventory of losses (IOL), severity of impacts, and list of DPs. The final cost of resettlement can be determined following completion of the DMS.
Compensation	Payment in cash or in kind to replace losses of lands, housing, income and other assets caused by the Project. All compensation is based on the principle of replacement cost, which is a method of valuing assets to replace the loss at current market rates, plus any transaction costs such as administrative charges, taxes, registration and titling costs.
Cut-off Date	The date after which people will not be considered eligible for compensation.
Dekhan Farm	Mid-size land, which is legally and physically distinct from household plots, for which full land use rights, but not ownership, is allocated to either individuals or groups. Regulations concerning dekhan farms in Tajikistan are laid out in Law No. 48 on Dekhan Farms, from 2002.
Encroachers	People who have trespassed onto private/government/community land for which they are not authorized to use. If such people arrived before the cut-off-date, they are eligible for compensation for any affected structures, crops or land improvements.
Entitlements	The range of measures comprising cash or in-kind compensation, relocation cost, income rehabilitation assistance, transfer assistance, income substitution/business restoration, which are due to DPs, depending on the type, extent and nature of their losses, and which suffice to restore their social and economic base.
Eligibility	Any person who resided in the Project area before the cut-off date that suffers from (i) loss of house, (ii) loss of assets or ability to access such assets, permanently or temporarily, or (iii) loss of income sources or livelihood, will be entitled to compensation and/or assistance.
Household	All persons living under one roof or occupying a separate housing unit, having either direct access to the outside (or to a public area) or a separate cooking facility. Where the members of a household are related by blood or law, they constitute a family. http://www.businessdictionary.com/definition/household.html
Hukumat	District administration in Tajikistan
Income restoration	This is the re-establishment of sources of income and livelihood of the affected households.
Income Restoration Program	A program designed with various activities that aim to support displaced persons to recover their income / livelihood to the pre-Project levels. The program is designed to address the specific needs of the affected persons based on the Socioeconomic (SES) survey and consultations.
Inventory of Losses (IOL)	This is a process in which all fixed assets (i.e. lands used for residence, commerce, agriculture; houses; kiosks, stalls and shops; ancillary structures, such as fences, gates, paved areas and wells, affected trees and crops etc.) with commercial value and sources of income and livelihood inside the Project right-of-way (Project area) are identified, measured, their owners identified, their exact location determined, and their replacement costs calculated.

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

Jamoat	A sub-district level administration
Land Acquisition	Refers to the process whereby an individual, household, firm or private institution is compelled by a public agency to alienate all or part of the land/assets for public purposes in return for in-kind replacement or compensation at replacement costs.
Land Acquisition and Resettlement Plan (LARP)	A time-bound action plan with budget setting out compensation for affected land/assets and resettlement strategies, objectives, entitlement, actions, responsibilities, monitoring and evaluation.
Non-titled	Means those who have no recognizable rights or claims to the land that they are occupying.
Poor	The poor are persons registered by the Hukumats as poor. The 'poorness' is based on the total score of points assigned for income of each household member, home condition, number of household's members, number and type of belongings such as a car and agricultural machinery, possession of animal livestock as the main poverty indicators.
Presidential Land	Means land for which use rights have been allocated by a Presidential Decree, but ownership remains with the state.
Rehabilitation	This refers to additional support provided to DPs losing productive assets, income, employment or sources of living, to supplement payment of compensation for acquired assets, in order to achieve, at a minimum, full restoration of living standards and quality of life.
Replacement cost	The calculation of full replacement cost will be based on the following elements: (i) fair market value; (ii) transaction costs; (iii) interest accrued, (iv) transitional and restoration costs; and (v) other applicable payments, if any.
Reserve Fund Land	Means land owned by the state and controlled by the district administration that may be rented, mainly for agricultural use.
Resettlement	This includes all measures taken to mitigate all adverse impacts of the Project on DP's property and/or livelihood. It includes compensation, relocation (where relevant), and rehabilitation as needed.
Severely Affected	This refers to affected households who will (i) lose 10% or more of their total productive land and/or assets, (ii) have to relocate; and/or (iii) lose 10% or more of their total income sources due to the Project.
Sharecropper	A person who cultivates land s/he does not own for an agreed proportion of the crop or harvest.
Significant impact	Means 200 or more people will experience major impacts, which are defined as; (i) being physically relocated from a house, or (ii) losing 10% or more of their income generating assets.
Vulnerable	Anyone who might suffer disproportionately or face the risk of being marginalized from the effects of resettlement and includes; (i) female-headed households with dependents; (ii) disabled heads of household; (iii) poor households; (iv) landless; (v) elderly households with no means of support; (vi) households without security of tenure; (vii) ethnic minorities; and (viii) small farmers (with landholdings of two hectares or less).

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

I. EXECUTIVE SUMMARY

1.1 Introduction

1. This is the Semi-annual Social Monitoring Report prepared for the Dushanbe Water Supply and Sanitation Project and covers the reporting period from January - June 2026. The report describes the status of project implementation, activities carried out by the contractors with regard to social safeguard issues, including grievances raised, resolved and/or rejected, mitigation measures provided during the monitoring period, and the actions planned to accomplish the outstanding issues.

2. To prepare this report, the consulting supervision company CES's (Consulting engineering services) and P.I.G.'s social safeguard specialists used a combination of several actions to collect primary and secondary data. The primary data were collected during interviews with displaced persons (DPs), discussions with the Project Implementation Group (P.I.G.) and direct observations on the ground.

3. In addition, the report provides suggestions for social impact management, checklist for monthly reporting, actions planned for the next reporting period.

1.2 Project background

4. The Asian Development Bank (ADB) allocated Grant No. 0612-TAJ in the amount of US $ 41.18 million in accordance with the Financing Agreement for the Dushanbe Water Supply and Sanitation Project (DWSSP). This project is the first ADB-funded project for the SUE "Dushanbevodokanal" (DVK). And also, within the framework of this Project, ADB additionally allocated Grant No. 0841-TAJ (AF) in the amount of 38.0 million US dollars. This additional funding is a natural extension of the DWSSP, known as its second phase. The scope of work of the allocated grants includes the rehabilitation of water supply, sewerage facilities and the strengthening of the institutional capacity of the SUE "Dushanbevodokanal" to improve its services in the Shohmansur district and the areas located in the south-eastern part of the city.

5. The proposed Dushanbe Water Supply and Sanitation Project will:

- Rehabilitate and expand the Dushanbe water supply system including upgrading the eastern section of the Kafernigan -1 wellfield, construct 12 km of trunk mains, and construct/upgrade reservoirs and pumping stations supplying Shohmansur District, supply approximately an additional 2,000 households with drinking water, establish 18 district metering areas in Shohmansur District to better control water losses, upgrade the water distribution system in selected DMAs and install a SCADA system;
- Rehabilitate the South Collector sewer to prevent overflows of raw sewage to water bodies and land;
- Develop and pilot test a sustainable business model for SUE-DVK including new network management practices and installation of a smart management system for operator efficiency and asset management;
- Provide capacity develop and institutional strengthening for DVK in areas of operation and maintenance, water quality testing, business planning and financial management;
- Provide project implementation support for project management, design and construction supervision.

6. The proposed Dushanbe Water Supply and Sanitation Project - Additional Financing intends to:
- Rehabilitation of the water pipeline d-800 mm from the left bank of the Kofarnihon River (KAF-2) to the reservoir of the pumping station on the right bank of the Kofarnihon River (KAF-1);

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

- Rehabilitation of 10 wells and electrical equipment at the water intake site Kofarnihon-2 (KAF-2);
- Rehabilitation of 10 wells and electrical equipment at the water intake site Kofarnihon-2 (KAF-2);
- Restoration of protective walls at the water intake site, Kofarnihon-1, as well as replacement of destroyed/eroded sections of shore protection structures at KAF-1 and KAF-2;
- Replacement of electrical equipment and restoration of backup power lines at KAF-I and KAF-2, as well as renovation of buildings and structures at Kofarnihon-2;
- Rehabilitation of main distribution pipelines and installation of water flow meters;
- Restoration of the water distribution network in 12 DMAs and connection to SCADA, with the restoration and replacement of worn-out water pipes, installation of water meters at consumer connection points;
- Reconstruction of pumping and electrical equipment at all pumping stations of the 3rd level (Bakhori, Kamola, Karoteginskaya, 191 microdistrict and 192 microdistrict) in the Shohmansur district
- Restoration of reservoirs of the Academy of Sciences of the Republic of Tajikistan in the Khovaron area;
- Replacement of overloaded and worn-out parts of sewer collectors in the streets: A. Radjabov, N. Muhammad and part of Ayni Street, and construction of a new sewer network in Karotegin and Zebunisso mahallas of Shohmansur district;
- Institutional support of State Unitary Enterprise "Dushanbevodokanal" and implementation of the SCADA information system.
- Detailed design and construction of a Women's Development Center in the Shohmansur district.

7. In the reporting period the project has complied with ADB SPS 2009 social safeguard requirements. This has been managed through regular site visit to the project location, consultations with the project communities, contractor and other project stakeholders on safeguard requirements, GRM procedures and monitoring of the construction sites to avoid any additional and/or unanticipated impact and providing access to available facilities and ensure undisrupted movement of people in the project sites.

8. Monitoring confirms that the LARP for the CW-03 package was prepared in October 2019, and was implemented satisfactorily with the payment of 100% of DPs compensations in November 2020 (that is affirmed by the level of DPs satisfaction). The report on the monitoring of the implementation of the LARP for CW-03 package was published in December 2020.

9. The LARP for CW-01 package (LOTs 1 - 2), was prepared in March 2021 and successfully implemented thereafter with payment of 100% of DPs compensations in September 2021 (that was affirmed by the level of satisfaction of the APs). The report on the monitoring of the implementation of the LARP for CW-01 was published in October 2021.

10. For the packages CW-02 and CW-04 (LOTs 1 - 2), the LARP was prepared in January 2022, and successfully implemented thereafter with the payment of 100% of DPs compensations in June 2022 (that is affirmed by the level of DPs satisfaction). The report on the monitoring of the implementation of the LARP for CW-02 and CW-04 (LOTs 1 - 2) packages was published in July 2022.

11. Also, LARP, for the package CW/AF -04 (LOT 1-2) (Additional Funding), was prepared in November 2022 and successfully implemented thereafter with the payment of 100% of DPs compensations in January 2023 (that is affirmed by the level of DPs satisfaction). The report on the monitoring of the implementation of the LARP for CW/AF-04 (LOTs 1 - 2) package was published in April 2023.

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

12. For the package CW/AF-05 (Additional financing) The SSDDR was prepared in September 2023, due to the fact that the DVK website was temporarily unavailable, this report was published in December 2023.

13. And also, for the package CW/AF-02 (LOT 1-2-3) (Additional financing) The SSDDR was prepared in December 2023, and was published in January 2024.

14. And also, for the package CW/AF -03 (Additional financing) the SSDDR was prepared In March 2024, and was published in April 2024

15. Also, for the CW/AF -01 package (LOT 1-2-3) (Additional financing) the LAR plan was prepared in October 2024 and was implemented satisfactorily with a 100% compensation payment to the DP in February 2025 (as confirmed by the level of satisfaction of the DP). The monitoring report on the implementation of the LARP for the CW/AF -01 package (LOT 1-2-3) was published in April 2025.

16. The Social Safeguard Due Diligence Report (SSDDR) for the design and upgrading of pipelines, water mains, pumping stations, and reservoirs in Quarters #9 and #13 of Khovaron Village was submitted to ADB on 7 October 2025 and endorsed by ADB on 14 October 2025.

17. In general, the project is carried out in accordance with the principles of safety and the requirements outlined in SPS 2009 ADB, as well as in national laws and regulations. However, compliance with the requirements should be maintained through effective management of social activities, such as ongoing consultations with project communities, monitoring of contractor work, and ensuring an effective grievance redress mechanism (GRM) throughout the project period.

1.3. Scope of Project Impact

18. At the first stage, the Project required land and assets acquisition due to rehabilitation/reconstruction of 9.46 km sewage collector for the implementation of CW-03. During this reporting period, the implementation of the LARP is being monitored.

19. At the second stage, the Project required land and assets acquisition due to reconstruction of water intake structures and main pipelines for the implementation of CW-01 (LOTs 1 - 2). Subsequently, Land Acquisition and Resettlement Plan (LARP) was prepared, implemented and compliance monitoring report was disclosed in October 2021. During this reporting period the implementation of the LARP is being monitored.

20. At the third stage, the Project required land and assets acquisition due to construction of reservoirs and pumping stations, along with water distribution networks for the implementation of CW-02 and CW-04 (LOTs 1 - 2). Subsequently, Land Acquisition and Resettlement Plan (LARP) was prepared and implemented. The LARP implementation compliance monitoring report was prepared and disclosed in July 2022. During this reporting period the implementation of the LARP is being monitored.

21. At the fourth stage, the project required the acquisition of land and assets in connection with the rehabilitation of the Karotegin and Zebunisso sewer networks for the implementation of CW/AF - 04 (LOT 1-2). Subsequently, a Land Acquisition and Resettlement Plan (LARP) was prepared and implemented, and a compliance monitoring report was published in April 2023. For this reporting period, monitoring is being carried out on the implementation of the LARP.

22. At the fifth stage, the project required the preparation of a Social Safeguard Due Diligence Report in connection with the detailed design and construction of a Women's Development Center for the implementation of CW/AF – 05. Subsequently, the SSDDR was prepared, and in December 2023 it was published on the DVK website. For this reporting period, monitoring on the implementation of SSDDR is being carried out.

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

23. At the sixth stage, the project required the preparation of a Social Safeguard Due Diligence Report in connection with the creation of the DMA and the restoration of secondary and tertiary networks for the implementation of CW/AF – 02 (LOT 1-2-3). Subsequently, the SSDDR was prepared, and in January 2024 it was published on the DVK website. For this reporting period, monitoring on the implementation of SSDDR is being carried out.

24. At the seventh stage, the project required the preparation of SSDDR in connection with the restoration of wastewater collectors of Aini, N. Muhammad and Academician Radjabovs streets for the implementation of CW/AF – 03. Subsequently, the SSDDR was prepared, and in April 2024 it was published on the DVK website.

25. At the eighth stage, the project required the acquisition of land and assets in connection with the Restoration of wells, pipelines, pump stations, and tanks CW/AF – 01, LOT-1 "Restoration of the eastern part of KAF-1", LOT-2 "Reconstruction of the water intake KAF-2 and the power line from the water intake KAF-2 to the water intake KAF-1" and LOT-3 "Replacement and restoration and/or modernization of power lines and water supply, Reconstruction of pump stations and construction and/or restoration of reservoirs and Reconstruction of pump stations of the 3rd rise". Subsequently, the LARP was prepared and implemented, and in April 2025, a compliance monitoring report was published.

26. At the ninth stage, the Social Safeguard Due Diligence Report (SSDDR) for the design and upgrading of pipelines, water mains, pumping stations, and reservoirs in Quarters #9 and #13 of Khovaron Village was submitted to ADB on 7 October 2025 and endorsed by ADB on 14 October 2025. The report assesses potential social impacts of the proposed works, including land acquisition, resettlement, and impacts on vulnerable groups, in accordance with the ADB Safeguard Policy Statement (2009). The SDDDR confirms that the proposed activities do not trigger involuntary resettlement or significant adverse social impacts and provides recommendations to ensure that social safeguards are appropriately managed during design and implementation.

Description	**Packages (Lots)**

27. The project remains in category “B” for involuntary resettlement in accordance with ADB SPS 2009. This internal monitoring is carried out by SMEC resettlement specialists and P.I.G. social safeguard specialist.

Table 1. Information on the implementation of social safeguards under Project components.

PUBLIC. This information is being disclosed to the public in accordance with ADB’s Access to Information Policy.

1.4 Public Consultations and Disclosure

28. During the current reporting period, no community consultation meetings were conducted. The ongoing major civil works contracts are being implemented within enclosed and controlled facilities, such as reservoirs and pumping stations, where there is no public access and no direct impacts on nearby communities or affected persons. Accordingly, no additional public consultations were considered necessary during this reporting period.
The P.I.G. Social Safeguard Specialist continued to monitor the implementation of the Project's social safeguard requirements throughout the reporting period. In addition, the Consulting Engineering Services (CES), the Project's Supervision Consultant, commenced its services in May 2026. The P.I.G. Social Safeguard Specialist and CES will continue to jointly monitor compliance with the Project's social safeguard requirements, including the implementation of the approved safeguard documents, identification of any unforeseen social impacts, monitoring of contractors' compliance with safeguard obligations, and ensuring that appropriate corrective actions and stakeholder engagement measures are undertaken whenever required, in accordance with the Asian Development Bank's Safeguard Policy and the Project's safeguard requirements.

29. The disclosure of information on the LARP and SSDDR was planned and implemented in accordance with the requirements of the approved LARP and SSDDR, see the table below. In particular, the following events were held:

a. Final LARP for the Project’s sewage component CW-03 in English was uploaded on the ADB and EA websites.
b. Final LARP for the Project’s water supply system component CW-01 (LOTs 1 – 2) in English was uploaded on the ADB and EA websites.
c. Final LARP for the Project’s water supply system component CW-02 and CW-04 (LOTs 1 – 2) in English was uploaded on the ADB and EA websites.
d. Final LARP for the Project’s sewage component CW/AF -04 (LOTs 1-2) in English was uploaded on the ADB and EA websites.
e. The final English version of the SSDDR was uploaded on the ADB website for the component of the CW/AF - 05 Women's Development Center.
f. The final English version of the SSDDR was uploaded on the ADB website for the water supply system component of the CW/AF -02 project (LOT 1-2-3).
g. Copies of the LARP and SSDDR in Russian were distributed in the offices of the contractors.
h. The final English version of the SSDDR was uploaded on the ADB website for the component of the CW/AF-03.
i. The approved LARP for packages CW-03, CW-01 (LOT 1-2), CW-02 and CW-04 (LOT 1-2), CW/AF - 04 (LOT 1-2), as well as the approved SSDDR for packages CW/AF - 05 and CW/AF - 02 (LOT 1-2-3) in Russian was posted on the EA website.
j. Public and individual consultations and informing the public about the construction work were carried out during the implementation of packages CW-03, CW-01 (LOT 1-2), CW-02 and CW-04 (LOT 1-2), CW/AF - 04 (LOT 1-2), as well as during the preparation of SSDDR for packages CW/AF - 05 and CW/AF -02 (LOT 1-2-3).
k. Social Safeguard Due Diligence Report (SSDDR) for the design and upgrading of pipelines, water mains, pumping stations, and reservoirs in Quarters #9 and #13 of Khovaron Village was submitted to ADB on 7 October 2025 and endorsed by ADB on 14 October 2025.

30. Within the framework of the project, a number of activities were carried out on the LARP and SSDDR. In general, these included continuous community consultation, identification of the impact of LARP, preparation of LARP and SSDDR, implementation of LARP, as well as

PUBLIC. This information is being disclosed to the public in accordance with ADB’s Access to Information Policy.

compliance monitoring and reporting. The table below provides more detailed information on social safeguards activities and the results achieved.

No	Packages	Activity	Period	Results
1.	CW/AF-01, Lots 1,2,3,	LARP monitoring.	From October 11, 2024 until the full completion of construction work.	Monitoring of activity will continue until the completion of construction work on the operation of the GRM.
2.	CW/AF-05	LARP monitoring.	From September 1, 2023 until the completion of construction work	Monitoring of activity will continue until the completion of construction work on the operation of the GRM.
3.	CW/AF-02 (ЛОТ 1-2-3)	LARP monitoring.	From April 19, 2024 until the completion of construction work	Monitoring of activity will continue until the completion of construction work on the operation of the GRM.
4.	1) CW/AF-05, 2) CW/AF-02 (ЛОТ 1-2-3) 3) CW/AF – 01 (ЛОТ 1-2-3)	Monitor the GRM and GRC activity	Continuously	The mechanism for handling complaints has been updated several times due to the addition of new contractors. The last update to the Grievance Redress Committee (GRC) was on February 23, 2023, and it is currently in effect. However, due to new contractors in the CW/AF-02 packages (LOTS 1-2-3) and CW/AF-01 (LOTS 1-2-3-4), there will be changes in the membership of the Grievance Redress Committee (GRC), so the GRC will be updated by August 2025. Community members were reminded that if they have any issues and/or suggestions, they can register a case with the available GRC by recording their concerns (verbally, by phone, or in writing) in the complaint register logs.
5.	CW/AF -01 (LOT 4)	Monitor the GRM and GRC activity	Continuously	Social Safeguard Due Diligence Report (SSDDR) for the design and upgrading of pipelines, water mains, pumping stations, and reservoirs in Quarters #9 and #13 of Khovaron Village was submitted to ADB on 7 October 2025 and endorsed by ADB on 14 October 2025. The report assesses potential social impacts of the proposed works, including land acquisition, resettlement, and impacts on vulnerable groups, in accordance with the ADB Safeguard Policy Statement (2009). The SDDDR confirms that the proposed activities do not trigger involuntary resettlement or significant adverse social impacts and provides recommendations to ensure that social safeguards are appropriately

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

				managed during design and implementation.
Expected work of social safeguard				
1.	CW/AF-01 (Lots 2, 3 and 4)	Monitor the LARP, SSDDR GRM and GRC activity	Continuously	The operation of the Grievance Redress Mechanism (GRM) and the Grievance Redress Committee (GRC) will continue to be monitored throughout project implementation. Any grievances received will be registered, assessed, and resolved in accordance with the approved GRM procedures. The GRC composition will be updated, where required, to reflect project implementation arrangements, and awareness of the GRM will continue to be maintained among contractors, workers, and affected communities. The P.I.G. Social Safeguard Specialist, together with the Consulting Engineering Services (CES), will continue monitoring compliance with the Project's social safeguard requirements and ensure that any social safeguard issues are promptly addressed in accordance with the ADB Safeguard Policy Statement (2009).

1.5. Institutional Arrangements

31. The core agencies and organizations involved in the LARP process are: ADB, Dushanbevodokanal, Dushanbe City authorities, Ministry of Finance, Ministry of Agriculture, State Committee for Land management and Geodesy (SCLMG), State Unitary Enterprise for Valuation (SUE) 'Narkhguzori', District Authorities, Local Executive Authorities (hukumats), jamoats, LAR Committee, and other state agencies.

1.6. Monitoring and Reporting

32. The implementation of the project is continually monitored to provide the DVK with the necessary support in assessing the resettlement-related issues, if any. Monitoring includes: (i) administrative monitoring to ensure timely implementation and resolution of issues; (ii) socio-economic monitoring right in place and after any resettlement impacts using basic information obtained from the socio-economic study of affected persons conducted during the preparation of the subproject; and (iii) general monitoring to assess the status of affected persons. The expert shall be bound to implement safeguard measures and appropriate protection plans, as provided for in legal agreements, and submit periodic reports on monitoring the effectiveness of their implementation.

33. The current semi-annual monitoring of social safeguard requirements implementation covers January-June 2026, and the report will be submitted to ADB by end of July 2026. Field monitoring of the construction sites was carried out monthly. In particular, the main areas of monitoring are:

- Functionality of the GRM and increasing its accessibility and efficiency;
- Consultations and disclosure of information to the local community and stakeholders;
- Temporary impacts (if any);

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

- Providing employment opportunities within the framework of the Project to members of vulnerable families.

II. OBJECTIVES OF SOCIAL SAFEGUARDS MONITORING

2.1 General Aspects

34. As per the approved LARPs, the project is subject to internal monitoring as the Project encountered insignificant number of Project affected persons facing involuntary resettlement. Therefore, internal monitoring of social safeguards has been undertaken on a regular basis by DVK assisted by SMEC's and P.I.G.'s social specialists.

35. Also, in accordance with the approved SSDDR, this report is subject to internal monitoring, although no impacts have been identified, but due to the fact that the facilities are located on the territory of the city, there is a need from the social guarantees of the DVK, with the assistance of social consultants of the SC (Supervision Consultant) and a social specialist of the P.I.G., regularly conducts internal monitoring.

36. The P.I.G.'s social safeguards specialist is in charge to conduct regular site visits, examine whether there is any impact to local residents, or land users. During these visits the specialist discussed with local residents' approximate timeframe for site clearance and further hearings on the construction works.

37. No social or economic impacts have occurred to date. The Project Implementation Group's (P.I.G.) social safeguards specialist prepares the relevant reports, while the Head of P.I.G. ensures that stakeholders are kept informed, updated, and able to provide feedback as required. These reports serve as the basis for any follow-up actions needed to address issues, and their current status is reflected in the Monthly Progress Reports.

38. The Construction Supervising Consultant has assisted P.I.G. in the process of internal monitoring to effectively detect and address any emerging social safeguards issues in the LARP implementation process and the construction period as well. The key objective of the internal social safeguard monitoring is to thoroughly review the process of social safeguards implementation as per the project requirements, specifically the LARP implementation such as the compensation process and grievance redress procedures during the entire project cycle as it has been stated in the approved LARP, which provides the indicators for monitoring of LARP and SSDDR as well as social safeguard issues.

39. The key objective of the periodic social safeguard monitoring and reporting is to assess whether the project complied with the ADB SPS 2009 requirements and National Laws provisions. Gauge the project APs satisfaction, monitor if actual impacts of the project were taken into consideration correctly and fully compensated as required by LARP stipulations and budget, if there is any additional and/or unanticipated impact that need to be documented and compensated prior to actual impact. In addition, due attention has been paid to the application of grievance redress procedures during the reporting period and entire project cycle. These are not limited to and include the following indicators:

a. Compensation payments disbursed
b. Replacement plots allocated (if required)
c. Housing and infrastructure construction completed
d. Resettlement of people completed (if required)
e. Income Rehabilitation and development activities initiated (if required)
f. Monitoring and evaluation reports submitted.

40. Social Impact monitoring indicators:

a. Assessment of GRM application and GRC efficiency through monitoring to determine whether:

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

i. All physical inputs committed in the LARP have been delivered and all services provided;

ii. Did mitigation actions prescribed in the LARP and SSDDR have provided the desired effects;

iii. Socioeconomic status of affected population against the baseline conditions before the displacement has not been deteriorated as a result of the Project impact.

iv. GRC was effective and efficient, and

v. Project affected persons were fully aware of GRC availability.

38. These objectives to be satisfied by a methodical review of the compensation records and an exacting verification confirming that the actual amounts paid to the APs corresponded with the amounts indicated in the final LARP and the processed AP contracts after the project LARP implementation.

2.2 Internal Monitoring Methodology

39. As stated above the major purpose of the internal monitoring is to determine whether the LARP compliance indicate that the compensation program had been carried out in accordance with the provisions of the laws of the Republic of Tajikistan, ADB SPS 2009, and to the satisfaction of the DPs. In addition, it is important to assess that social impacts are well mitigated through the instruments stipulated under the approved LARP and SSDDR, and undertaken in compliance within the country legislation, social safeguards guidelines and to the extent possible meet the best international practice.

40. To meet the requirements the National Consultant initially conducted desk reviews, closely reviewed the approved LARP, SSDDR and Grievance Logbooks

41. Grievance Redress effectiveness was confirmed in the complaint logs available at the facilities, in the P.I.G. and Jamoats of the communities affected by the project. P.I.G social safeguard specialist visited the sites regularly every 2 weeks.

42. In addition, the P.I.G. Social Safeguard Specialist conducted several field visits to the project sites to monitor the implementation of project activities and verify compliance with the Project's social safeguard requirements. The monitoring focused on ongoing construction activities, confirming that the works were being implemented within the approved project footprint and that no unforeseen social safeguard issues, including impacts on land, assets, or livelihoods, had arisen during the reporting period.

43. The following areas are routinely addressed during the internal monitoring and evaluation of project performance process:

a. Grievance Redress Mechanism functionality

b. Unanticipated/temporary impacts or damages

c. Possible needs for realignment of ROW, design changes

d. Possible needs for livelihood Rehabilitation, provision of mitigation measures, etc.

44. Listed below are the Instruments and Indicators for Social Impact and Project Performance monitoring and assessment:

a. Assessment of the efficiency of Grievance Redress measures:

1. Frequency and contents of lodged grievances

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

2. Practice of Grievance redress: timing of collection, review and response time required by GRC

b. Assessment of resolved and rejected grievances:

1. Instruments and timing exercised to address any cases of unanticipated impacts
2. Assessment of the effectiveness of provided mitigation measures based on the recipients' feedback
3. Assessment of income Rehabilitation of vulnerable and severely affected AHs.

2.3 Social Monitoring Capabilities

45. Following the completion of the Project Management and Design Supervision Consultant (PMDSC) contract, the P.I.G. engaged the national Construction Supervision (CS) consultant, CES Ltd., to supervise the remaining construction works. The CES team includes a National Social Safeguard Specialist who supports the implementation and monitoring of all social safeguard activities under the Project. The P.I.G. Social Safeguard Specialist and the CES Social Safeguard Specialist work in close coordination to ensure compliance with the Asian Development Bank's Safeguard Policy Statement (2009), monitor contractors' adherence to social safeguard requirements, identify and address any unforeseen social impacts, support the operation of the Grievance Redress Mechanism (GRM), and prepare the required social safeguard monitoring documentation throughout the remaining implementation period.

46. Also, for the preparation and updating of the LARP, according to the Project procurement plan, after a detailed design by the PMDSC, an individual national consultant at the local level was selected, who additionally supported the P.I.G. The consultant prepared four Social Safeguard Due Diligence Reports for packages CW/AF-05, CW/AF-02 (LOT 1-2-3) and CW/AF-05, as well as the LARP for package CW/AF-01 (LOT 1-2-3) and CW/AF-01 (LOT 4).

47. The responsible persons for the social safeguards management and monitoring of the project were as follows:

a. **P.I.G.**: Social safeguard Specialist
b. **CES ltd (CS)** Social safeguard Specialist

III. FINDINGS OF THE INTERNAL MONITORING

3.1 General

48. Since the P.I.G. was specifically focused on monitoring social guarantees, implementing the LARP for packages CW/AF-01 (LOT 1-2-3) and SSDDR for packages CW/AF-05, CW/AF-02 (LOT 1-2-3), and CW/AF-01 (LOT 4) as well as the effectiveness of the complaint handling procedures undertaken during this reporting period, the assessment was conducted regarding the following indicators.:

a. Awareness on project of population within project impact area
b. Frequency and DPs coverage of public hearings
c. Grievance redress practice
d. Potential for project related impacts including unforeseen losses and damages that might occur during construction or operation phases, requiring careful monitoring and remedial steps to be taken, as required
e. The LARP program for CW/AF-04 (LOT 1-2) has been implemented and the DP satisfies the compensation.

49. The implemented LARPs of the all mentioned packages contain five recommendations for improving the safeguards compliance of the project. The status of implementation of the recommendations concerning social safeguards shown in table 3 below:

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

Table 3. Status of implementation of the recommendations given in the LARP in the period before/during construction CW/AF-01 (ЛОТ 1-2-3)

Subject	*Recommendations in the LARP*	*Actions taken towards implementation*	*Actions required and target dates to compass the implementation*
1. Identify impacts along the pedestrian paths leading to business units and people in settlements, particularly the points where the walkways interfere with construction works, and take control over them.	- a. the duration of the restrictions in the movement must be as short as possible - b. contractor must provide; - safe and adequate access for pedestrians and vehicles to: fire cocks, houses, commercial and industrial enterprises, schools, parking lots, service stations, hotels, fire and police stations, hospitals and institutions.	The Traffic Management Plan (TMP) is developed by Contractors and must be endorsed by the local authorities and the road department. The Contractor of the sewage component has developed an H&SMP, which specifies safety measures in construction. The Contractor of the water supply component is developing an H&SMP, which shall embrace safety measures in construction.	For packages CW-04 LOT 1, CW/AF-04 LOT 1-2, CW/AF-02 LOT 1-2 3, based on the order of the Mayor of Dushanbe, a Traffic Management Plan was developed and approved, except for the package CW/AF-05, since the facility is located on the territory of SUE "DVK". And also, the following protection measures were implemented in all facilities: Signs are placed; Protective nets; Ribbon; Walkways over trenches.
2. The P.I.G. for the DWSSP should ensure effective functioning of the GRM	a. Increasing the number of ways to file grievances. b. Register all grievances received, regardless of the form, place and date of their submission; c. update the GRC at the city level; d. Conduct a mini-training for the Contractor's personnel on social safeguards in accordance with the ADB's policy and the legislation of Tajikistan. e. GRC members should be trained in complaint management.	DVK issued an order to update the committee, concerning the representatives at the city level, representatives of the Contractors and the Engineers Team. In particular, the focal employees (resident engineers, H&S specialists, etc.) should participate in this training. The main focus of this training shall be among other things on the principles and policies related to involuntary resettlement, (IR), complaints administration, public consultations/hearings;	The GRC was updated three times on November 20, 2020, December 30, 2021 and February 23, 2023. If the composition of the GRC changes, as well as if the composition of the GRC increases due to new contracts, the GRC will be updated until the August of 2025. The registration books were delivered to the contact persons on December 3, 2020, January 5-6, 2022, July 27-28, 2022, January 14-15, 2023, November 13-14, 2023, 15-16 April 2024, as well P.I.G. and PMDSC conducted Contractor personnel training on November 29 and 30, 2021, December 5-6, 2021, July 27-28, 2022, January 14-15, 2023, and September 14-15, 2023, 15-16 April 2024, as well. On December 30, 2021, May 10, 2022, September 5-6, 2022 and February 20-21, 2023, the P.I.G.

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

			held a training meeting with GRC members.
3. Continue public consultations/hearings throughout the construction period.	During the consultations, inform people about the project activities, ask about their concerns and discuss the temporary negative impacts associated with the project.	The frequency of these consultations is be agreed between the P.I.G. and the Contractor.	P.I.G. and PMDSC hold consultations at the beginning of each quarter with contractors. Social issues have also been discussed at each monthly meeting.
4. Conduct a purposeful study to identify members of vulnerable families who are interested in and can be occupied in suitable jobs during the construction of sewage collector and water supply component.	The study should be carried out with the support of local authorities and jamoats. Thereafter, the list of identified persons, should be discussed and agreed with the Contractor. The employment opportunities provided by the Contractor to vulnerable DPs, not only guarantee a stable income for the recovery and improvement of pre-project living conditions, but also a chance offered to acquire non-agricultural skills without leaving the locality. The Contractor must provide on-the-job training to the DPs who will be offered the job within the framework of the Project, with the consideration of occupational health and safety issues;	The P.I.G. conducted a pointed survey with the coordination of jamoats and heads of microdistricts and made a list of persons from vulnerable families, who expressed interest and were able to work. The list of persons who expressed interest and were able to work is being considered and discussed with the Contractor to see what employment opportunities can be given. The Contractor agreed to regard the employability of the listed DPs as a priority, and will develop a special training program for local employees.	A list of all vulnerable families interested in employment in accordance with the LARP for the CW-01 LOT 1-2, CW-02, CW-03, CW-04 LOT 1-2, CW/AF-04, LOT 1-2 pacts was provided to contractors. Contractors informed the P.I.G. about Vacancies from the specified list, but no one from the list of vulnerable families wanted to work, but mostly contractors use the services of local residents who live in the Shohmansur area. In total, there are more than 40 people (30 men and 10 women) from among the local residents.
5. Pay attention to gender mainstreaming in participation of the targeted communities in consultations/public hearings and related events	Maximize women's participation in public consultations/ or separate meetings should be held with women during construction period. However, it is necessary to continue interaction even after the LARP implementation, in order to identify problems concerning women and children, and at the same time, using this opportunity, to broaden the role of women in solving issues concerning the communities.	The P.I.G. has coordinated its actions with the jamoats to identify an active group of women in the targeted villages and ensure their participation in consultation meetings together with the DPs.	During January - June 2025, 3 community consultations were held (May 15, June 02, and June 04, 2025, three consultations were held) and more than 20 individual consultations, in which 67 people participated, of which 21 were men and 46 were women (without double counting). Consultation meetings were held on 26 September 2025 in the 192nd microdistrict and the 9th microdistrict of Khovaron mahalla in relation to the CW/AF-01, LOT-4. Although no impacts or inconveniences to local residents are anticipated, these meetings were conducted to ensure

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

			transparency and inclusive participation of key stakeholders.

3.2 Awareness of population of project area

50. To ensure that relevant project information is made available to project-affected persons (APs) and other stakeholders, the P.I.G. continues to implement stakeholder communication and information disclosure activities in accordance with the Project's social safeguard requirements. During the reporting period, the P.I.G. Social Safeguard Specialist, together with the Construction Supervision (CS) Consultant, CES Ltd., conducted regular site monitoring visits to ongoing construction sites to monitor compliance with social safeguard requirements, including the operation of the Grievance Redress Mechanism (GRM), the availability of GRM information at construction sites, and the absence of unforeseen social impacts.

51. During the current reporting period, no formal public consultation meetings were conducted. This was because the ongoing construction activities were confined to enclosed and controlled facilities, such as reservoirs and pumping stations, where there was no public access and no direct impacts on surrounding communities or affected persons. Consequently, no issues arose that required public consultation during the reporting period.

52. Although no public consultation meetings were required during the reporting period, stakeholder engagement remained an ongoing process. The P.I.G. and CES continued to monitor the implementation of social safeguard requirements through regular site visits and coordination with contractors. Information on the Project and the Grievance Redress Mechanism (GRM) remained available at active construction sites through information boards displaying the contact details of the responsible GRM focal points, and grievance boxes remained accessible for receiving complaints and suggestions.

53. Based on the monitoring undertaken during the reporting period, no social safeguard issues requiring additional stakeholder consultations were identified. The P.I.G., together with CES, will continue to monitor the implementation of the Project's social safeguard requirements and will organize public consultations whenever required by project activities or if any unforeseen social impacts or community concerns arise, in accordance with the Asian Development Bank's Safeguard Policy Statement (2009) and the approved safeguard documents.

3.3. Consultation meetings (public hearings)

54. During the current reporting period, no public or individual consultation meetings with affected persons were conducted, as no land acquisition or resettlement activities were being implemented and the ongoing construction works were confined to enclosed facilities, including reservoirs and pumping stations, with no direct impacts on surrounding communities. Instead, the P.I.G. Social Safeguard Specialist, together with the National Social Safeguard Specialist of the Construction Supervision (CS) Consultant, CES Ltd., carried out regular site monitoring visits to the active construction sites. The monitoring focused on verifying compliance with the approved social safeguard documents, confirming that construction activities remained within the approved project footprint, monitoring the functionality of the Grievance Redress Mechanism (GRM), and ensuring that no unforeseen social impacts, including impacts on land, assets, livelihoods, or vulnerable groups, had occurred during the reporting period.

55. Throughout the reporting period, project information remained available to workers and the public through information boards installed at active construction sites, which displayed the contact details of the Grievance Redress Mechanism (GRM) focal points and responsible personnel. Grievance boxes remained in place and accessible at construction sites. Based on the monitoring undertaken by the P.I.G. and CES, no social safeguard issues requiring additional consultations or corrective actions were identified during the reporting period. The P.I.G. and CES will continue to monitor compliance with the Project's social safeguard requirements and maintain stakeholder engagement, as necessary, throughout the remaining implementation period in accordance with the Asian Development Bank's Safeguard Policy Statement (2009).

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

3.4. Grievance Redress Practice

56. Grievance redress procedures are established and exercised in the process of project implementation cycle. The GRM is available to allow GRC to provide effective and systematic mechanism in responding to queries, grievances and complaints from APs and stakeholders.

57. The P.I.G. social specialists asked several interviewees to assess public awareness regarding the GRM and existence of GRC. All interviewed persons knew that in case of any claim or complaint they could apply to GRC and file the grievance with GRC at the local level.

58. The time period required for the GRC to review submitted claims or grievances is 14 calendar days, which is considered a reasonably efficient process for review, assessment, approval or rejection, and the provision of relevant feedback to claimants. If the case is complex or requires more detailed investigation (e.g. inspection by technical experts or legal opinion from the state or certified private entities) the complaint review period may be extended to 30 calendar days or more, if necessary. In such cases, written notification should be sent to the complainant explaining the reasons for extension, describing the process and indicating the expected dates for the delivery of the results of the revision.

59. If the complaint is not resolved within the set timeframe, or the complainant is not satisfied with the GRC decision, s/he can appeal at the Dushanbe City level GRM. The Dushanbe City level GRC focal person will register the complaint/appeal, issue a written note with information on the timeframe for grievance resolution (14 to 30 days, depending on the complexity of the case) and initiate a review of the complaint. The focal person should initiate the grievance review and convene the GRC meeting no later than 5 days since the complaint was registered as eligible for the GRM. All supporting documents – photo and video materials, required certificates, legal opinions, technical expert opinions if practicable – should be prepared prior to the meeting. The minutes of each meeting should be agreed and signed by all members of the GRC no later than 3 days following the gathering.

60. All enquiries/grievances related to the Project will be addressed with the participation of the P.I.G. The GRM covers issues related to social, environmental and other safeguard issues under the ADB SPS 2009 and applicable laws of Tajikistan. In accordance with the updated DVK decree No.49 dated February 23, 2023 the following are the designated members of the GRC at the Project level:

Table 4: Grievance Redress Committee at the Project Level

Name	Position	Telephone
Qalandarov S.	SUE DVK Chief Engineer	93-421-04-44
Haqnazarova M.	Chief of the department for security and civil defense	918 92-96-96
Saidzoda U.	Chief of dispatch services	902 22 66-05
Davlatova Sh.	DVK President of the Profsojuz Committee	93-560-56-22
Hafizov J.	PIG DVK social specialist	900-00-18-86
Grzegorts Rokitcki	Engineer's (PMDSC) representative	111-44-21-21
Otambekova Z.	PMDSC social specialist	93-572-25-55
Qosimov F.	Representative of LLC "Kangurt-2" (CW-03/2)	918-46-26-00
Tuhtaev B.	Representative of OJSK "TGEM" and LLC "AZ-Kompozit" (CW-03/4)	005-22-28-68
Boboev I.	Representative of OJSK "TGEM" (CW-01, Lot-1)	93-413-11-00
Sodiqov A.	Representative of OJSK "TGEM" and LLC "AZ-Kompozit" (CW-01, Lot-2)	887-00-60-55
Firuzi Nigmatullo	Representative of OJSK "Tojik SGEM" (CW-02)	98-999-10-64
Tagoimurodov KH.	Representative of LLC "Stroy-Centr" (CW-04, Lot-1)	93-108-88-88
Umarzoda S.	Representative of Company "Blue Star Group" and LLC "Joint venture Ittihod inshoot and Zumrut" (CW-04, Lot-2)	009-55-75-59
Kholov Sh.	Representative of Consortium between OJSK "TGEM", LLC "AZ-Kompozit" and LLC "Stroy-Centr" (CW-04/AF, Lot 1-2)	98-999-23-79

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

Sharipov H	Head of Engineering communal department of Shohmansur district	907- 84-82-55
Roziqov S.	Chief Engineer of the State Institution "Department of Work with Mahallas and Services of the Housing and communal fund under the Executive Bodies of Shohmansur district"	918-25-64-89

61. For GRM proceedings the P.I.G. may need one or more meetings for each complaint and may require field investigations by specific technical or valuation experts. Grievance cases shared by more than one complainant may be held together as a single case.

62. For appeals lodged directly to the DVK, the designated person (social and gender specialist), together with the GRC will review the case and attempt to find a resolution together with the aggrieved person.

63. At each level of appeal, the GRC will be assisted, as required, by the professional capacity needed to solve specific cases. This may include among others,

- Jamoat and/or Hukumat and mahalla representatives
- Related land committee
- Representatives of the State Agency for Architecture
- State Agency for Environment and Forestry
- State Unitary Enterprise for Housing and Communal Services
- Technical expertise from professional water and sanitation engineers
- Representatives of displaced persons
- Representatives of Women's Affairs
- Other specialized organizations as necessary
- Representatives of NGOs/CSOs active in the area.

1. During the reporting period, Social Safeguards Specialists visited some of the settlements and took copies of the complaint logs (see Table 5). In addition, an interview with the P.I.G. for DWSSP was conducted on this topic. As a result, it was revealed that during the construction works, the Project received three complaints from residents and these complaints were resolved positively. There are no outstanding grievances at the end of this reporting period.

64. It should be noted that all complaints are mostly advisory. Due to the fact that construction work is being carried out on the territory of the city, mostly residents ask to quickly close the trenches or that they also be provided with water at the end of construction work. At the moment, basically all sections of the road where construction work was carried out have been returned to their original position. Where asphalt was paved, and in areas where there were paving stones, it was again restored with paving stones. There were no further questions from the communities and complaints were closed (see photos).

65. The “Conclusions and Recommendations” section contains recommendations for possible improvements to the project GRM.

Table 5: Detailed information about registered complaints:

№	Name of the complainants	Claim	Date filed	Measures taken	Current status
1.	Raufov Abdurahmon	Request that the contractor to start work on my site after a week so that I can harvest my crop	30/09/2021	Construction work on this site was carried out after the harvest.	Resolved on 04.10.2021
2.	Mirzoalimov Rahmatjon	Before starting construction work on my site, please notify me in advance so that I can transplant my trees	30/09/2021	Before starting construction work on the mentioned site, the complainant were informed in advance. In addition, during the passage of this section, the contractor promised to help with transplanting the trees.	Resolved on 04.10.2021
3.	Komiljonov Sodiq	Before starting construction work on my site, please notify me in advance so that I can transplant my trees	30/09/2021	Before starting construction work on the mentioned site, the complainant were informed in advance. In addition, during the passage of this section, the contractor promised to help with transplanting the trees.	Resolved on 04.10.2021
4.	Akhmadaliev Nematullo	The pipe that supplies irrigation water to the arable lands after construction work was installed just above the tray; hence, water did not get on the arable lands. In addition, during the construction works the trays, which are located along the road, were filled with stones and rubbles during.	20/10/2021	The Contractor reinstalled the irrigation pipe as the complainant requested it. In addition, the tray were cleared of stones and rubble.	Resolved on 26.10.2021
5	Bekmurodov Abduqqahor	The state of the roads is bad and the people have complaints that their children cannot reach schools. The entire site is full of puddles, mud, many pothholes and etc.	10/01/2022	The roads were improved by filling the potholes, drying the pubbles, washing away the mud and finally laying the crushed stone.	Resolved on 17.01.2022
6	Kholiqova Ochilbi	We have no drinking water since the construction works started.	08/02/2022	The P.I.G. through the Contractor has arranged the regular supply of drinking water until the supply line of the	Resolved on 10.02.2022

PUBLIC. This information is being disclosed to the public in accordance with ADB’s Access to Information Policy.

				complainant was not restored. Now, the complainant has water supply as had before the construction commenced.	
7	Unusov Saidmurod	The roads are muddy, difficult to pass; trays were damaged and water flows on the road.	04/03/2022	The road were cleaned by watering truck. In addition, the trays were reinstated, cleared of stones and rubble, and water is no more flowing on the road.	Resolved on 06.03.2022
8	Mirzoaliev Rahmatulloev	Construction works must be completed as soon as possible. We need pipes to irrigate our land plots.	04/04/2022	The Contractor reinstalled the irrigation pipe as the complainant requested it.	Resolved on 07.04.2022
9.	Bozorov Abdukahor	During construction work, a small part of the roof was broken. CW-01/02	28/06/2022	The contractors apologized for the inconvenience and promised to fix the roof	The problem was solved by contractors within two days
10.	Atoev Qiyomiddin	According to the project, the designer had to use 15 m of land, but in the end, more than half of the site was covered. CW-01/02	08/2022	After discussing the problem with contractors, the issue was resolved. Contractors paid additional damages to the owner and reinstated the land.	Resolved
11.	Komiljonov Sodiqjon	During construction work, the contractors intend to remove 15 meters of corn field, which will lead to crop loss. CW-03/02	16/08/2022	Contractors left the field untouched and laid pipes on the other side of the field	Resolved in two days
12.	Rahimov Solm, Nurov Berdi	Our houses are in a state of disrepair, if contractors dig up the road, it will lead to their destruction CW-02	23/08/2022	Problem solved, contractors redid the work manually	Resolved on 06/10/2022
13.	Murodov Muhammad	The roads are excavated, cars cannot pass because we are in a blocked area and we have children and elderly people who need to be transported by car. CW-04/02	28/11/2022	Problem solved, contractors filled trenches, provided additional safety measures and restored the road	Resolved in one day
14.	Shabnam Khodjaeva	Part of her land (4 of my fruit trees are affected by your project. CW-02	23/12/2022	During the meeting, SMEC specialists and contractors found out that from the citizen side Khodjaeva, fruit trees aged from 6 months to 1 year were planted along the project line. The	Resolved in one day

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

				specialists explained the essence of the project, and according to the that, she was not supposed to fence the territory and plant trees where the construction work would be carried out. As a result, we came to a general agreement and the contractor transplanted thoese trees to another place.	
15.	Saialiev Amirhamza	He complained about the work of the builders, the roads are all excavated after the rain, it is impossible to walk along the street "CW-04/02	06.01.2023	The trench was backfilled on the contractor's side. If the weather is favorable, all road sections will be returned to their original state.	Resolved 02/06/2023
16.	Murodov Muhammad	Complained through the phone, so that part of the excavated roads along Umed Street would fall asleep. CW-04/01	03.01.2023	The problem is solved, the contractors filled in the trenches, and the cars can pass. In addition, the applicant was explained, according to building codes, the timing of backfilling the trench.	Resolved 09/02/2023

65.	Pulatov Rustam	The pavement covered with cobblestones was damaged by the builders. CW/AF-02/1	09.08.2024	Explanatory work was carried out. According to the project, all roads where construction work will be carried out will be restored to at least their original position.	10.08.2024
66.	Tagaev Ismatullo , Sharipova Faizimo	Residents complained that their homes were not connected to the water supply system CW/AF-04/1	22.08.2024	The contractor connected their house to the water supply system.	24.08.2024
67.	Rachabova Muhayo	A resident complained that her house was not connected to the water supply system CW/AF-04/1	27.08.2024	The contractor connected her house to the water supply system.	28.08.2024
68.	Sayorai Mirzosharif	After construction work the walls of the house cracked CW-01/2	30.08.2024	Although her house was in such a state before the construction work, the contractor offered assistance in the amount of 2000-3000 somoni, but she refused.	
69.	Otakhonova Maksuda	Builders do not water the roads during construction work, dust is everywhere CW/AF-02/1	30.08.2024	The contractor has fixed this problem.	01.09.2024
70.	Ibragimov Maruf	After construction work, the drainage channels were not restored to level and need to be restored CW-01/2	02.09.2024	The contractor has corrected all the defects.	06.09.2024
71.	Sharipov Abdullo	After construction work the water pipe was broken CW/AF-02/1	10.09.2024	The contractor has fixed this problem.	17.09.2024
72.	Residents of the Kushteppa mahalla	After construction work, the builders did not install the manhole cover, which is why there is an unpleasant smell. CW-03/4	20.09.2024	The contractor has fixed all the problems	05.10.2024

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

73.	Karimov Shamsiddin	Residents complained that their house was not connected to the sewer network CW/AF-04/1	15.10.2024	The contractor connected his house to the sewer network	20.10.2024
74.	Fayziev Mukhiddin	A resident complained about the poor condition of the road surface. CW/AF-04/1	15.10.2024	The contractor has fixed all the problems	25.10.2024
75.	Makhmadkulov Fakhriddin	The resident asked to run the pipe through his yard to avoid dismantling the gate. CW/AF-04/1	01.11.2024	The contractor carried out the work manually to avoid dismantling the gate.	05.11.2024
76.	Murodova K.	After construction work, the roads are not paved, water continues to flow from the well CW/AF-02/1	28.11.2024	The contractor restored the roads, but the well belongs to the Far Eastern District.	29.11.2024
77.	Aminov S, Kobilov V., Makhmadkulo v F.	Residents asked to dig trenches manually, as the use of heavy equipment during construction could damage the walls of their houses and fences CW/AF-04/1	03.12.2024	On the contractor's side, according to the project, construction work where the walls are located close to the trenches was carried out manually.	06.12.2024
78.	Turakulov A.	Resident complained about unsatisfactory condition of roads after construction work, builders did not remove garbage CW/AF-01/2	20.01.2025	The contractors have completed work on this site and put everything in order.	23.01.2025
79.	Tosheva Gulsoro	The resident expressed dissatisfaction with the laying of pipes and insisted on pipes with a diameter of 100 mm. CW/AF-1/3	22.01.2025	The contractors explained that they would install one 100mm diameter pipe and leave the existing pipe.	24.01.2025
80	Khojaeva Mamlakat	A resident complained about the malfunction of water supply system #121 (water hose breakage with leakage under high pressure) of contractors regarding CW/AF-1/3	22.01.2025	The contractors explained the situation by the fact that residents arbitrarily hid the VSh, which led to a malfunction. As a result, the contractors eliminated the identified damage and restored the equipment.	26.01.2025
81.	Sudurova M.	The director of kindergarten #159 complained about the work of the builders, that the dug trenches were left open. Since they were on the territory of the kindergarten, it was unsafe for the children. CW/AF-02/3	12.05.2025	The contractors laid the pipes and soon completed the work successfully, closed the trenches and returned the earth to its original position.	18.05.2025

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

82.	Faizulloev N.	Resident complained about garbage after construction work by contractor CW/AF-02/1	19.05.2025	The contractor removed construction waste and eliminated all inconveniences.	20.05.2025
83.	Zakulloeva Gulsum	Resident of the Shohmansur-3 mahalla, submitted a complaint regarding the condition of the roads following the completion of construction works	14 July 2025.	The contractor undertook road reinstatement works in accordance with the established technical requirements	16 July 2025
84.	Rahimzoda Dovudkhudja	A community leader of Khovaron mahalla (Plots 13, 14, and 15), submitted a complaint regarding inconveniences caused by dust generation on road sections following the completion of construction works	29 July 2025	The contractor carried out dust suppression measures by watering the roads using water trucks, which removed sand from the road surface and reduced dust levels	30 July 2025
85.	Sharipov J.	Resident of Khovaron Street, House No. 495, Quarter 13, submitted a complaint stating that following road and excavation works in the area, soil and mud had not been properly removed, causing inconvenience to residents and negatively affecting the sanitaion condition of the surrounding area	12 August 2025	The contractor under the CW/AF-01 Lot 3 addressed and resolved the reported issues	18 August 2025
86.	Rahmonov A.	We hereby inform you that the Contractor utilized our land during the construction process. We therefore request that you plow (rehabilitate) our plots.	01 January 2026	Resolved by the Contractor under CW/03-3. The Contractor rehabilitated (plowed) the affected land plots following the completion of construction activities, thereby addressing the complainant's request. The grievance has been closed.	15 January 2026
87.	Habibov I.	Contractor utilized our land during the construction process. We therefore request that you plow (rehabilitate) our plots.	10 January 2026	Resolved by the Contractor under CW/03-3. The Contractor rehabilitated (plowed) the affected land plots following the completion of construction activities, thereby addressing the complainant's request. The grievance has been closed.	15 January 2026

PUBLIC. This information is being disclosed to the public in accordance with ADB's Access to Information Policy.

88.	Marakoev A.	After the completion of the construction works, we request the contractor that you plow (rehabilitate) our plots.	10 January 2026	Resolved by the Contractor under CW/03-3. The Contractor rehabilitated (plowed) the affected land plots following the completion of construction activities, thereby addressing the complainant's request. The grievance has been closed.	15 January 2026

IV. FINAL CONCLUSIONS

4.1. Monitoring Findings

2. The results of monitoring for the reporting period confirmed that no physical and/or economic consequences occurred during this period.

66. A GRC has been established to review and resolve complaints. Three complaints were filed during this reporting period. Displaced persons and the general population in the area affected by the project are aware of the existence of the GRC and know how to apply it in case the construction work has an impact on their assets or access to assets.

4.2. Plans for the Next Reporting Period

67. From January to June 2026, the P.I.G. social safeguard specialist will continue to monitor compliance with the LARP requirements for packages CW/AF – 01 (Lot 1-2-3), as well as requirements SDDR for packages CW/AF – 02 (Lot 1-2-3) and CW/AF-01 (LOT 4) during the entire construction period.

68. Listed below are the activities that must be carried out during the implementation of the project by an individual local social specialist and social safeguard specialists of the P.I.G. and SMEC:

a. Review of Grievance record Logbooks, select satisfied and rejected claims and organizes the individual meetings with the claimants to assess the efficiency of GRC and level of satisfaction of claimants, after delivery of the compensations to affected persons;

b. Based on the analyses of Grievance Log records identify the major trends of claims, complaints and if necessary, conduct public consultation meetings to address sensitive issues;

c. If such need identified, conduct capacity building training for GRC members on local level;

d. Conduct further implementation/compliance monitoring in coordination with the P.I.G. social safeguards specialist.

e. Additional activities will be planned, agreed and implemented based on the initial findings and based on the status of project activity.

1.2. Following forms and tools (not limited to) will be used in the process of LARP implementation and project compliance monitoring activities:
